Large format (36" x 200") PDF printing for GenoPro

(I think the maximum dimension for a PDF is normally 200")

First download and install the latest Pdf995 printer driver (version 16) and the Free Converter (version 1.5) from <a href="http://www.pdf995.com/download.html">www.pdf995.com/download.html</a> (it seems that both are needed)

Created by Martyn, March 2016

Change the paper size to "PostScript Custom Page Size"

Then edit "Custom Page Dimensions" and set to Inch, Width to 36" and Height to 200", (and set paper feed direction to "Long Edge First" if it's not already set to long edge first)

OK this.

Then set Graphic/ Print Quality to 600 DPI in the "PDF995 Printer Driver Advanced Options"; (I have also tried with this set to 300 DPI and it still works) OK this, and more OK's to exit the "Print Setup" option and return to the main GenoPro window

Back in the main GenoPro window, go to File/Page Layout,

Set the left/right/top/bottom margins to 0.5 inches

Untick "Single Page" and "Landscape" and delete the numbers in "Paper Dimension" (select with mouse & then "Delete" key;

:::+++ -===++ 八の卒音 )	W ## ##   今 小 小 小 →   ※ ② ◇   今 ∞ →   <b>小</b> 3

Press Save to continue.

Do not worry about the various sponsor adverts which appear during the print stage, they do not appear on your final PDF print

Created by Martyn, March 2016

Watch the progress bar to monitor the printing status, when the printing PDF to file is completed, you can close any "advert" windows
